

REASONS TO CHOOSE RE-UPHOLSTERY

SKILLED TRADE

1

Upholstery combines art, science, math, and history with instinct and vision. Each upholstered piece is the result of the thoughtful application of centuries of knowledge and innovation.

SUPPORTS LOCAL ECONOMY

2

By working with an upholsterer, you are supporting a small business owner, keeping your money in your community, investing in entrepreneurship, and contributing to a more self-sufficient, prosperous, and culturally vibrant place to live.

WASTE REDUCTION

3

Investing in reupholstery keeps furniture in use and out of the landfill. The upholstery industry is uniquely positioned to help tackle the growing furniture waste crisis, which has grown from 2 million tons to over 12 million tons in just one generation.

HEIRLOOM RESTORATION

4

Older furniture was designed for longevity, with high-quality materials and superior construction. Upholsterers use both traditional and modern techniques to breathe new life into antiques, ensuring that heirlooms remain useful and beautiful, bringing joy and comfort to multiple generations.

CUSTOMIZATION

5

To create the ideal piece for you, an upholsterer will interpret, inform and realize your vision in consideration of your personal aesthetic, space, functional requirements, comfort, cost, and the nature and quality of materials desired/available.

QUALITY MATERIALS

6

An upholsterer will be able to provide you the highest quality materials available according to your needs. Decisions made based on comfort, longevity and function are far superior to the fast and inexpensive choices made in the course of mass production. Natural or chemical-free materials are also an option.

ARTISTRY

7

The magic begins, in the art of upholstery, when experience is combined with love, science matched with flair and creative decisions matched with industry standards. The art of upholstery is found in the bones of the frame as well as the upholsterer.
